A total expense ratio (TER) is a measure of a portfolio's annual expenses, fees and charges, expressed as a percentage of the average daily value of the portfolio. These expenses include the annual fee, VAT, audit fees, bank charges and costs incurred (excluding trading costs) in any underlying funds. Included in the TER, but separately disclosed, is a performance fee (or credit) resulting from overperformance (or underperformance) against the benchmark. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. Performance return information and prices are always stated net of the expenses, fees and charges included in the TER. The TER for the fund's financial year ended 31 March 2022 was 0.93%.

Performance fees align investor and manager return objectives by rewarding the manager for realising the manager for underperformance. Foord's performance fee is increased proportionately. Similarly, underperformance causes the daily performance fee rate to decrease proportionately. Performance fee rates are not capped for the reason that outperformance is good.

The annual fee is adjusted up or down daily by the performance fee rate between the rolling one-year net-of-fee return and the benchmark return, multiplied by the performance fee sharing rate.
