MARKET SYNOPSIS (Q2 2026)

WORLD

- Growth outlook less uncertain
- Inflation risks re-emerging
- Central banks may have to raise rates
- Earnings potentially under pressure from rising costs
- Geopolitical tensions remain elevated

SOUTH AFRICA

- Growth constrained and vulnerable to external shocks
- Energy supply stable but system remains fragile
- Inflation risks rising via higher fuel prices
- Limited scope for rate cuts amid global uncertainty
- Rand sensitive to global risk sentiment

STRATEGY (Q2 2026)

WORLD

- Meaningful allocation to equities
- Low allocation to expensive US equities
- Prefer countries with resilient earnings profiles
- Prefer inflation-linked TIPS over nominal US Treasuries
- Physical gold position hedges global risks

SOUTH AFRICA

- Remain cautious on resources sector
- Preference for staple food producers and retailers
- Limited exposure to financials, given economic risk
- Healthcare remains a key defensive allocation
- Moderate holdings in SA bonds with preference for linkers
